

For high purity material

These valves are built for high purity applications and are constructed with high purity materials. They are available in 1/2" and 3/4" sizes and are suitable for use in applications where high purity is required. They are suitable for use in applications where high purity is required.

Material Selection:

These valves are built for high purity applications and are constructed with high purity materials. They are suitable for use in applications where high purity is required. They are suitable for use in applications where high purity is required.

These valves are built for high purity applications and are constructed with high purity materials. They are suitable for use in applications where high purity is required. They are suitable for use in applications where high purity is required.

1/2" High Purity Valve

Material	Material
Body	316L SS
Stem	316L SS
Ball	316L SS
Seat	PTFE
Handle	Aluminum
Internal Components	316L SS
Seals	PTFE
Valve	316L SS
Ball	316L SS
Seat	PTFE
Handle	Aluminum
Internal Components	316L SS
Seals	PTFE

3/4" High Purity Valve

Material	Material
Body	316L SS
Stem	316L SS
Ball	316L SS
Seat	PTFE
Handle	Aluminum
Internal Components	316L SS
Seals	PTFE
Valve	316L SS
Ball	316L SS
Seat	PTFE
Handle	Aluminum
Internal Components	316L SS
Seals	PTFE
