

Contents measurement in iron ore and coal

The challenge

Our electromechanical system NIVOBOP NB3200 is an electromechanical system with additional advantages because of the tape version with integrated tape cleaner. Thus, the costs for maintenance is reduced. The NB3200 delivers reliable results and offers long-life and stability also in difficult conditions. All in all, 90 units of series NB3200 have been installed in various applications.

Products

NB 3200 Tape Version

Continuous Level Measurement

- Suitable for use in most bulk materials.
- Integrated tape cleaner to remove adherent materials.
- Mounting with threaded or flange connection.
- Measuring range up to 50m.
- Convenient level monitoring via Modbus interface together with cost competitive Nivotec 3500/4500.
