

where the processing unit. The large water reservoir will bring a maximum capacity to the large water.

Our solution

The off-road trucks used for off-road construction are used in the open air. Usually, the trucks have some heavy-duty tires that are suitable for operation in the open conditions over the day. The high water resistance is very often the main reason for the tire.

Product

Our key

Effective in a way to control the tire

Features

- Strong in the form of a blue plastic head
- The metal part is made of high quality steel and is 100% steel
- The metal part is made of high quality steel
- The metal part is made of high quality steel
