

Level limit measurement in grain with ATEX approval

The challenge

Our customer in Hungary searched for level limit detection with ATEX approval for his grain plant mill.

Our solution

The rotating sector sensor **WSP000V2 (W4001)** and the rotating paddle sensor **WCP000V2 (W4001)** have been chosen for this application. They are the best solution for the level control in grain and switch over in small vessels easily installed. Both series are available with ATEX approval. They offer the customer the best cost-performance ratio.

Products

WSP 4001

Pat., Demand, Empty Detector
Shut sensor

- Vertical, horizontal and oblique installation.
- Cost competitive detector.
- Compact extension length: 105mm.
- Ideal for small process vessels and large silos.
- Able to withstand high mechanical loads due to short extension length.

WCP 4001

Pat., Demand, Empty Detector
Shut sensor

- Vertical, horizontal and oblique installation.
- Ideal detector for process vessels or small storage containers.
