

Other sensors

The z and y coordinates of the z - y plane are measured by a 2D laser range finder. In addition, the position and orientation of the gripper is measured with respect to an absolute coordinate system. The gripper is a high-resolution differential drive gripper.

Problems

16.100-6: Navigation Task Exercise:

16.100-6: General Mobile Robotics

Problems: 16.100-6

- Introduction: general mobile robotics
- Exercise: robot navigation in a 2D environment
