

InnovaMass. Reinvented.

In 1992 Sierra was the first to introduce a combination ultrasonic surface and multi-orifice mass flow meter. Today, Sierra's completely redesigned InnovaMass iSeries™ 2400/2410 builds on ten decades of accurate measuring the process variables for gas, liquid and steam with one connection.

Now, with the latest in gas flow measurement, robust software applications, field diagnostics and adjustment capability, and a new state-of-the-art flow calibration facility, Sierra's entire iSeries delivers precision, performance, and operational flexibility never before possible.

It Has Apeel

Experience InnovaMass flow energy management tools directly on our new iReport™ 1.0 that will empower your process and save you time and money.

- iFlow™ easily improves one flow measurement calculation
- iCostFlow™ allows you to quickly change pipe diameters in the field
- iGasFlow™ measures a variety of fluids wherever you choose
- iMFC™ makes flow control custom gas functions
- iMFC™ makes gas applications simple

Field Independence

With Sierra's extensive SmartSurfaces™ Fluids (SF) tap into your InnovaMass and bring up a variety of powerful software enhancements without your meter's performance.

- iFlow™ iEnergy™ corrects environmental noise, greatly increasing accuracy
- iCostFlow™ Diagnostically checks meters meter performance and estimates output
- iMFC™ iReport™ upgrades in the field
- iReport™ a mobile app for your cell phone in 2010

World-Class Flow Calibration Facility

Every flow meter is only as good as its calibration. Each InnovaMass is calibrated by Sierra's new calibration facility in Whittier, California, to ensure the most precise performance. Flow standards with accuracy better than 0.2% of reading are used to ensure the highest accuracy possible.

Next Day Shipping

Only Sierra's online store to custom configure and buy InnovaMass. We stock select models for next day shipment. Sierra is the only company in the industry where you can buy online, make your buy, then. www.sierrainstruments.com/ibuy
