

PRESSURE AND LEVEL TRANSMITTERS "ALL STEEL"

SERIES 8000-SAR

- 100% STEEL CONSTRUCTION
- 2000 AND 5000 BAR RANGE
- ALL MODELS COMPLY WITH SIL L1 AND SIL L2
- HIGH-CLASS FLARE CONNECTION
- LARGE COMPATIBILITY
- MATERIAL: A 304, A 316, A 316L
- HIGH-CLASS CONNECTION FOR 1/2" AND 3/4" DIA.
- INTEGRATION OF THE 4-20mA SIGNAL

DESCRIPTION

The Series 8000 SAR is an all-steel pressure transmitter based upon a piezo ceramic sensor with integral microcontroller. The transmitter can fully compensate for temperature. The Series 8000 SAR is an extremely compact but nevertheless well capable of withstanding 10,000 PSI and 5000 BAR. The design of the all-steel housing ensures long operational lifetime. Thanks to the fully compensable and the precision high-precision sensor, the Series 8000 SAR will allow a wide range of dynamic conditions and a choice of output from which the output version required. A complete range of accessories is available for further configuration.

8000-SAR with mounting bracket
Type: 8000-SAR
