

## SUBMERSIBLE LEVEL TRANSMITTERS

With small Capacitive Ceramic sensor

# AQUACER

**HART** by  
Endress+Hauser

- Accuracy 0.1% (static) 0.15%
- Ceramic Capacitive Sensor
- Roaming 0.1mm
- Perfect long term stability
- Temperature compensated

The Aquacer is a precision level transmitter with built-in 4-20 mA output transmitter designed for use in all liquids.

The 10 mm diameter ceramic capacitive level transmitter Aquacer is made of 316L stainless steel and is available in different versions depending on the application. Features include an anti-interference electromagnetic field control up to 100 kHz.
