

HYDROBAR

- ✦ AVAILABLE IN 10'
- ✦ 15' AND 20' LENGTHS
- ✦ 100% STAINLESS STEEL (316L/316SS)
- ✦ 100% STAINLESS STEEL (316L/316SS)
- ✦ 100% STAINLESS STEEL (316L/316SS)
- ✦ 100% STAINLESS STEEL (316L/316SS)

DESCRIPTION

The "Hydrobar" series are submersible level transmitters with a range of 20 feet and more. To measure the level in containers, deep wells, underground tanks, concrete tanks and more.

The "Hydrobar" transmitters are available in three large flowable tanks or still applications and are used.

All operations are fully automatic, and are equipped with strong float mechanism that allows the sensor to maintain its position for long-term stability.
