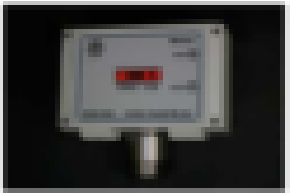
Features

- Microprocessor based
- 4-20mA analogue Output
- Voltage free relay contacts
- RS485 digital interface
- Addressable, multi-drop capability
- "One Person" calibration
- Dust protection
- Temperature compensation
- Condensate operation



Typical Applications for the IR30:

- Biogas
- Landfill Sites
- Sewage processing
- Coal Gasification Plants
- Cavities
- Chemical Processing
- Ventilation Systems
- Laboratories
- Petroleum Farming
- Greenhouses
