

Get More From Motors with Digital Display

Features

- 1000 rpm resolution for speed, torque and efficiency results
- 4800 rpm for 1000 rpm resolution for speed and torque
- 1000 rpm resolution for torque, torque and efficiency
- Temperature sensor for motor temperature
- Low speed and high torque resolution for motor torque
- Frequency to speed graph without motor speed
- Frequency to torque graph without motor speed
- Frequency to efficiency graph without motor speed
- 1000 rpm

TopTrak 822/824

Advantages

• The instrument features the latest digital display and torque sensor technology for improved accuracy and speed resolution. The instrument is designed for use in a wide range of applications and is available in a variety of configurations.
