OXYTRANS INNOVATION

If required OXYTRANS can be supplied with a manual or pneumatic retractable unit made of electro-polished stainless steel. Equipped with an automatic safety lock while the sensor is removed, this is the perfect solution for all manufacturers who cannot stop production for maintaining the sensor. Also, this feature safely protects the optical window during cleaning of the plant – even with the most aggressive cleaning detergents. The retractable unit has two connections for optimum sterilization and a stroke of just 36 mm.

Innovation. Dedication. Centec.
